December 2023

## Elkins Rehabilitation & Care Center

### November Employee of the Month

Lydia Schoonover,  
Environmental  
Service  
Aide/Laundry

Congratulations go out to Lydia Schoonover for November's employee of the month. She is married to Paul Schoonover and they have two children: Lori is twenty-five and currently lives in New York; Walker is fourteen and they live in Elkins. She graduated in 1996 from Tucker County High School. She has been an employee of ERCC for eleven years. She also has an Early Childhood Education Specialist certificate from Fred Eberly Vo Tech. She loves crafts especially working with canvas. She is a member of the Seventh Day Adventist Church on Kennedy Street in Elkins. Be sure to congratulate her for being the Employee of the month!

## BIRTHDAYS THIS MONTH

Linda Dean

Debra Mallow

Samuel Wamsley

Resident's birthday party will be held in dining area on December 27 at 2PM. All residents are invited to attend

**MASKS AND BUTTERFLIES 11-7-23 AND 11-10-23 WITH OLD BRICK.**

**Veterans Day Program November 9.**

VFW Post Commanders Mr. Amorse and Mr. King gave out pens and certificates to our veterans to honor their services. Listed are names of the veterans in our facility that were present during the presentation and proudly served our country.

**US ARMY**

- Cary Beasley
- Donald Bennett
- Junior Bishoff
- Robert Butcher
- Charles Fox
- Calvin Isner
- James Kyle
- James Parsons
- Kessler Pingley
- Kenneth Simpson
- Meredith Sparks
- Charles Leary

**US NATIONAL GUARD**

- Thomas Romine

**US AIR FORCE**

- Charles Fox
- Darrell Hanlin

- Noble Parfitt

## OPERATION CHRISTMAS CHILD SHOE BOXES

Our residents participated in Operation Christmas Child and made 24 shoeboxes to be dropped off at a specific location to send to different countries. They participate each year in the hopes of spreading joy to children in need all around the world. They place in the boxes toys, school supplies and personal care items. Our residents are very compassionate in helping others.

**Lunch Box  
dining out  
November 16**

**Gingerbread  
birdhouses  
with Old Brick**

**11-17-23**

**Making turkey caps with Old Brick. 11-21-23**

❤️ Look who we caught coming down the hall. ❤️  
Mr. and Mrs. Noble Parfitt 🥰

Enjoying Thanksgiving Dinner together. Mr and Mrs Parfitt

**Nativity Scene  
donated by  
Residents Council**

**UPCOMING EVENT**

**RESIDENT  
COUNCIL  
ANNUAL  
CHRISTMAS &  
BOX LUNCH SALE  
FRIDAY  
DECEMBER 8, 2023  
IN THE  
CLASSROOM  
10:30AM – 1:00PM**

**Lunch Includes-  
2 Hot Dogs, Macaroni Salad,  
Chips, Cookie \$6.00  
Nachos with Chili, Cheese,  
Jalapenos, Sour Cream \$4.00  
Many Goodies to choose  
from  
Crafts & Baked Goods too!!  
Come Support our  
Residents!!!!**

## VACCINE INFORMATION STATEMENT

# COVID-19 Vaccine: What You Need to Know

Many vaccine information statements are available in Spanish and other languages. See [www.immunize.org/vis](http://www.immunize.org/vis)

Hojas de información sobre vacunas están disponibles en español y en muchos otros idiomas. Visite [www.immunize.org/vis](http://www.immunize.org/vis)

### 1. Why get vaccinated?

COVID-19 vaccine can prevent COVID-19 disease. Vaccination can help reduce the severity of COVID-19 disease if you get sick.

COVID-19 is caused by a coronavirus called SARS-CoV-2 that spreads easily from person to person. COVID-19 can cause mild to moderate illness lasting only a few days, or severe illness requiring hospitalization, intensive care, or a ventilator to help with breathing. COVID-19 can result in death.

If an infected person has symptoms, they may appear 2 to 14 days after exposure to the virus. Anyone can have mild to severe symptoms.

- Possible symptoms include fever or chills, cough, shortness of breath or difficulty breathing, fatigue (tiredness), muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, or diarrhea.
- More serious symptoms can include trouble breathing, persistent pain or pressure in the chest, new confusion, inability to wake or stay awake, or pale, gray, or blue-colored skin, lips, or nail beds, depending on skin tone.

Older adults and people with certain underlying medical conditions (like heart or lung disease or diabetes) are more likely to get very sick from COVID-19.

### 2. COVID-19 vaccine

Updated (2023–2024 Formula) COVID-19 vaccine is recommended for everyone 6 months of age and older.

COVID-19 vaccines for infants and children 6 months through 11 years of age are available under Emergency Use Authorization from the U. S. Food and Drug Administration (FDA). Please refer to the Fact Sheets for Recipients and Caregivers for more information.

For people 12 years of age and older, updated COVID-19 vaccines, manufactured by ModernaTX, Inc. or Pfizer, Inc., are approved by FDA.

- **Everyone 12 years and older** should get 1 dose of an FDA-approved, updated 2023–2024 COVID-19 vaccine. If you have received a COVID-19 vaccine recently, you should wait at least 8 weeks after your most recent dose to get the updated 2023–2024 COVID-19 vaccine.
- **Certain people who have medical conditions or are taking medications that affect the immune system** may get additional doses of COVID-19 vaccine. Your health care provider can advise you.

Some people 12 years of age and older might get a different COVID-19 vaccine called Novavax COVID-19 Vaccine, Adjuvanted (2023–2024 Formula) instead. This vaccine is available under Emergency Use Authorization from FDA. Please refer to the Fact Sheet for Recipients and Caregivers for more information.

### 3. Talk with your health care provider

Tell your vaccination provider if the person getting the vaccine:

- Has had an **allergic reaction after a previous dose of COVID-19 vaccine** or an ingredient in the COVID-19 vaccine, or has any **severe, life-threatening allergies**
- Has had **myocarditis** (inflammation of the heart muscle) or **pericarditis** (inflammation of the lining outside of the heart)
- Has had **multisystem inflammatory syndrome** (called MIS-C in children and MIS-A in adults)
- Has a **weakened immune system**

In some cases, your health care provider may decide to postpone COVID-19 vaccination until a future visit.

U.S. Department of  
Health and Human Services  
Centers for Disease  
Control and Prevention

People with minor illnesses, such as a cold, may be vaccinated. People who are moderately or severely ill should usually wait until they recover. People with current COVID-19 infection should wait to get vaccinated until they have recovered from their illness and discontinued isolation.

Pregnant people with COVID-19 are at increased risk for severe illness. COVID-19 vaccination is recommended for people who are pregnant, breastfeeding, or trying to get pregnant now, or who might become pregnant in the future.

COVID-19 vaccine may be given at the same time as other vaccines.

---

#### 4. Risks of a vaccine reaction

---

- Pain, swelling, or redness where the shot is given, fever, tiredness (fatigue), headache, chills, muscle pain, joint pain, nausea, vomiting, and swollen lymph nodes can happen after COVID-19 vaccination.
- Myocarditis (inflammation of the heart muscle) or pericarditis (inflammation of the lining outside the heart) have been seen rarely after COVID-19 vaccination. This risk has been observed most commonly in males 12 through 39 years of age. The chance of this occurring is low.

People sometimes faint after medical procedures, including vaccination. Tell your provider if you feel dizzy or have vision changes or ringing in the ears.

As with any medicine, there is a very remote chance of a vaccine causing a severe allergic reaction, other serious injury, or death.

---

#### 5. What if there is a serious problem?

---

An allergic reaction could occur after the vaccinated person leaves the clinic. If you see signs of a severe allergic reaction (hives, swelling of the face and throat, difficulty breathing, a fast heartbeat, dizziness, or weakness), call 9-1-1 and get the person to the nearest hospital.

Seek medical attention right away if the vaccinated person experiences chest pain, shortness of breath, or feelings of having a fast-beating, fluttering, or pounding heart after COVID-19 vaccination. These could be symptoms of myocarditis or pericarditis.

For other signs that concern you, call your health care provider.

Adverse reactions should be reported to the Vaccine Adverse Event Reporting System (VAERS). Your health care provider will usually file this report, or you can do it yourself. Visit the VAERS website at [www.vaers.hhs.gov](http://www.vaers.hhs.gov) or call 1-800-822-7967. *VAERS is only for reporting reactions, and VAERS staff members do not give medical advice.*

---

#### 6. Countermeasures Injury Compensation Program

---

The Countermeasures Injury Compensation Program (CICP) is a federal program that may help pay for costs of medical care and other specific expenses of certain people who have been seriously injured by certain medicines or vaccines, including this vaccine. Generally, a claim must be submitted to the CICP within one (1) year from the date of receiving the vaccine. To learn more about this program, visit the program's website at [www.hrsa.gov/cicp](http://www.hrsa.gov/cicp), or call 1-855-266-2427.

---

#### 7. How can I learn more?

---

- Ask your health care provider.
- Call your local or state health department.
- Visit the website of the Food and Drug Administration (FDA) for COVID-19 Fact Sheets, package inserts, and additional information at [www.fda.gov/vaccines-blood-biologics/industry-biologics/coronavirus-covid-19-cber-regulated-biologics](http://www.fda.gov/vaccines-blood-biologics/industry-biologics/coronavirus-covid-19-cber-regulated-biologics).
- Contact the Centers for Disease Control and Prevention (CDC):
  - Call 1-800-232-4636 (1-800-CDC-INFO) or
  - Visit CDC's COVID-19 vaccines website at [www.cdc.gov/coronavirus](http://www.cdc.gov/coronavirus).
